

## Senior Project Manager

### Background

Triax Technologies, Inc. develops technology devices for construction site connectivity to improve the safety of workers and keep productivity moving forward. Our Spot-r wearable and sensor technology platform provides total jobsite visibility, identifying worker and equipment location, utilization and interaction, while keeping users informed of safety incidents as they occur, resulting in faster response to injuries, improved safety performance and increased efficiency. We are committed to delivering the first truly connected jobsite, partnering with dedicated industry leaders, solution providers and experts to enable real-time, data-driven project, workforce, equipment and safety management. Founded in 2012, Triax offers employees a unique, fast-paced, creative, and independent work environment. We are dedicated to constant innovation and collaboration, and are looking for like-minded individuals to join our team.

### Job Description

We are looking for a Senior Project Manager to help us deliver outstanding technology products using agile methodologies. Your role is to manage the development and delivery of hardware and software products as well as coordinate the daily activities of the implementation team(s). You'll also be working with upper management to set milestones and product roadmaps.

This job is in our product development center in East Hartford, CT but will require bi-weekly meetings in our headquarters in Norwalk, CT.

### Responsibilities

- Manage multiple projects from initiation to execution
- Develop overall project management strategy and process
- Single point of accountability, “owning” projects, driving their success
- Manage cross-functional teams with a motivational, proactive approach
- Ensure production efficiency on a daily basis through efficient resource planning, resource productivity and allocation
- Coordinate with upper management and business analysts to discuss and identify project requirements and objectives while managing expectations
- Plan, manage and lead all project related meetings and presentations
- Ensure that goals are communicated and adhered to in production, while contributing your point of view openly and honestly
- Assist with the hiring of technology team-members

### **Required Qualifications**

- 5 or more years of experience planning and implementing a wide variety of projects
- 2+ years of experience recruiting and managing project team members
- Proven track record of launching cutting-edge projects
- Mastery of software development process from an information architecture, design and technical perspective
- Be a self-starter
- Excellent time management skills and ability to multi-task and prioritize work
- Attention to detail and problem-solving skills
- Excellent written and verbal communication skills
- Experience with Atlassian products (Jira, Confluence) a plus

### **Benefits Include**

- Comprehensive health, dental and vision insurance
- 401k Plan
- Paid holidays
