Spot-r® by Triax is a comprehensive solution that offers a proprietary blend of devices, network, application, and insights to capture, synthesize, and act on field data.

Where our clients find proof of value

CASE STUDY 1 Invista's Orange, TX plant partnered with Triax during a major Turnaround Event to measure and optimize contract labor spend. Using Spot-r, Invista uncovered substantial bottlenecks negatively impacting productivity. Productivity was measured and reported to block coordinators in real-time; empowering Ops Managers to make real-time decisions. Spot-r insights yielded substantial improvement to Time On Tool and increased ROI for the entire project.

CASE STUDY 2 Major general contracting firm used Triax solutions across multiple sites with a variety of use cases. Using 4 years of data, customer validated Triax enabled sites had a 63% drop in incidents due to risk identification, improved safety culture, and fraud prevention.
